

TO SUPPLY LEFTOVER FOOD TO POOR

Date	20-06-2025
Team ID	LTVIP2025TMID29611
Project Name	To Supply Leftover food to Poor
Maximum Marks	

Chapter 9

Advantages & Disadvantages

✓ Advantages

- **Reduces food waste:** Prevents edible food from ending up in landfills, helping the environment and cutting greenhouse gas emissions.
- **Alleviates hunger:** Provides immediate relief to those facing food insecurity, especially in urban areas and during emergencies.
- **Promotes social responsibility:** Encourages individuals, restaurants, and businesses to contribute to community welfare.
- **Cost-effective aid:** Offers a low-cost method of food distribution compared to preparing new meals from scratch.
- **Builds community trust:** Strengthens relationships between donors and recipients, fostering a culture of care and solidarity.

⚠ Disadvantages

- **Health risks:** If not stored or handled properly, leftovers can harbor bacteria like *E. coli* or *Salmonella*, leading to food poisoning.
- **Lack of infrastructure:** Many regions lack cold storage, transport, and distribution systems to deliver perishable food safely.
- **Legal and liability concerns:** Donors may worry about being held responsible if someone gets sick from the food.
- **Stigma and dignity:** Recipients may feel embarrassed or stigmatized receiving leftovers, especially if the food is of poor quality.
- **Inconsistent supply:** Leftover food is unpredictable in quantity and type, making it hard to plan balanced meals or meet dietary needs.
